

Hide the vacuum
and the hose

Hide-A-Hose™

 Electrolux

The Hide-A-Hose™ retractable hose system solves the problem of carrying and storing a central vacuum hose. Simply pull out the amount of hose you need and begin vacuuming. When you are finished, the suction pulls the hose back into the wall for you.

Easy to use.

Simply pull out the amount of hose you need from the Hide-A-Hose™ inlet valve, connect your cleaning wand or attachment and begin vacuuming. Hose lengths are available in 30, 40, 50, and 60 foot lengths. Each inlet can cover up to 2,300 sq. ft.

Easy to store.

When finished, detach the cleaning wand from the hose and the suction from the central vacuum power unit retracts the hose into the wall.

For new construction and existing homes.

Installation for newer and existing homes is simplified with the need for fewer inlet valves on each floor. Fewer inlets will save time and makes vacuuming more convenient.
